

OFFICIAL WHITE PAPER

# FEED Token

You can help stop hunger today

feed

## Summary:

Our Purpose

World Hunger Overview

Why Crypto

Tokenomics

Road Map

Our team

# Our Purpose

Feed token is committed to work with Hunger Organizations around the world to help people in need.

## Our mission

The intent of Feed Token is to stop world hunger, improve nutrition and reduce food waste through a transparent and efficient system.

Donations will certainly be received by thousands of people who need to improve their lives. We assure due diligence in the sense that your contribution is used for legitimate purposes, reaching its intended beneficiaries.

We are here to bridge the gap between those people most in need and those willing to lend a helping hand.

How are we planning to do this? Feed Token does it by means of using cryptocurrency. This allows us to acquire and transparently distribute donations through several recognized organizations that are looking for ways to alleviate world hunger.

## Our model is supported by the following items:

-  Holding a benefit to raise money.
-  Philanthropic marketing actions
-  Digital marketing
-  Commitment of Organizations struggling against hunger
-  A strong donor's community

# World Hunger Overview

## Every 10 seconds a child dies from hunger

- 16.6% of the world's population is undernourished.
- 1 Billion people are living in extreme poverty.
- More than a billion people live on less than \$1.25 a day, which totals to \$8.75 a week. This means that poor people can only spend \$455 a year, whereas the average American spends \$7,852 a year just on food. One cannot even afford to buy a gallon of milk at market price for that amount of money a day.
- As the largest and most populated continent, Asia is home to approximately 4.427 billion people. Sadly, more than 550 million of this population are still starving today.
- From a nutritional viewpoint, a healthy diet should include about 2100 calories. However, chronically hungry people eat even less than 1800 calories a day. For instance, it is known that everyday an Ethiopian child just receives one piece of "Injera", a traditional kind of bread, which has only 166 calories and no nutritional value at all. Hidden hunger is a form of chronic hunger.
- Astonishingly, 45% of all child deaths are from causes related to undernutrition. Every year, 3.1 million children die from hunger-related causes, which include diarrhea and malnutrition.
- More than 99 Million children under the age of five are still undernourished and underweight by virtue of an unbalanced diet.

# Why Crypto?

Cryptocurrency is here to stay. It is established that in the near future at least 30% of world transactions will be done on blockchain currency.

When it comes to charity crypto is one of the best options based on this main reasons:

## Strong security

When you perform the transaction in cryptocurrency, you cannot reverse it.

## Low transaction fee

It is easier for donors to send money to organizations.

## Easy transactions

It is fast, clear, and easy to make crypto transactions.

## Tokenomics

- The contract is deployed on the Binance Smart Chain on address: 0xabcd.....
- Name: FEED Token
- Symbol: \$FEED
- The tokenomics are as follows:
- Total supply: 100,000,000 Feed tokens.
- PreSale: 35,000,000 Feed Tokens, with no vesting.
- Pancake pool initial liquidity: 35,000,000 Feed tokens.  
All LP tokens will be burned, locking away the seed liquidity for ever!
- Angel investors: 10,000,000 Feed Tokens vested over 10 months:  
6 month initial lock in period
- Marketing wallet: 10,000,000 Feed tokens vested over 07 months
- Charity wallet: 5,000,000 Feed tokens vested over 10 months
- Team wallet: 4,000,000 Feed tokens vested over 08 months  
3 month initial lock in period
- Airdrop: 1,000,000 Feed tokens.

# Token Features

FEED Token is an auto-staking and auto-liquidity token, where all transactions obey the following mechanisms:

## Reflection:

3% of every transaction will be redistributed to all FEED holders, in proportion to their wallet token balance, implementing auto-staking.

- This means the amount of tokens in your wallet will forever increase as people transact. In effect, holders get rewarded for just holding FEED in their wallets.

## Locked Auto Liquidity:

2% of every transaction is converted into FEED/BNB LP tokens, which contributes to the liquidity pool on Pancakeswap.

- This continuously increases the liquidity pool, which leads to a permanently growing price floor of FEED.

## Contract Ownership

The ownership has been renounced in a dead address after deployment.

## Token Vesting

All tokens allocated to Team/Charity/Marketing/Angel Investors wallets are safely locked away in individual TokenVaults, and vest over long time periods (from 07-10 months), using a Vesting Smart contract.

Wallets	Vesting schedule
Charity	10% at listing and 10% monthly basis
Marketing	30% at listing and 10% monthly basis
Team	3 months lock and 20% monthly basis
Angel investors	6 months lock and 25% monthly basis

The Token Vault is a novel, secure smart contract on the blockchain with no functions! It is only used to store unvested tokens, which can be withdrawn by the Vesting smart contract as and when they vest.

The simplicity of the vault code means that it is impossible to withdraw tokens from it by unauthorized/malicious actors, or even by the vesting beneficiary, before the vesting has matured.

The entire code for Token Vaults, and the Vesting smart contract has been audited, and no issues have been identified.

The vesting contract is deployed at: 0xabcd....

# Roadmap

## Phase 1

- Launch BETA website
- Launch social media channels
- Start marketing campaign
- Token deployment
- Tchr rate paid Audit
- Launch BETA White Paper
- Presale
- Having \$FEED listed on Pancakeswap – Launch!

## Phase 2

- Launch BETA website
- Our first donation to a foundation against world hunger
- Launch our final website
- Blockfolio listing
- Coinmarketcap listing
- Coingecko listing
- Official White Paper
- Becoming a legal entity
- Having logo and price available on Trust Wallet
- Keep donating to foundations against world hunger
- Merch store (all profits go to charity wallet)

## Phase 3

- Being listed on CEX exchange
- Partnership with certified charity institutions
- Promote \$ FEED in the mainstream media
- Launch the \$FEED projects (finance research and development projects to fight hunger)

## Phase 4

- Partnership with celebrities to take \$FEED globally
- Being listed on a major exchange
- Start our \$FEED Foundation
- Implement additional uses for \$FEED

# Our Team

## Founders:

- Martin, 21 years old. From Argentina. Software engineer student. Low cap cryptocurrency investor since 2020. He came up with the idea of \$FEED Token.
- Christian, 38 years old, father of one. From Argentina. Graduate in Commercialization. Has been a technical salesperson in the pharmaceutical industry for the last 15 years. Has been performing charitable actions for his country and his church for 26 years. He inspired \$FEED Token.
- Sebastian, 40 years old, father of three. From Argentina. Has been an Entrepreneur for 14 years. He owns pharmaceutical and health industry related businesses. Cryptocurrency investor since 2019. He brought \$FEED Token's team together.

## Chief Programmer

- Piyush, 22 years old. Indian. Computer Science & Blockchain engineer, with more than 4 years of experience in writing smart contracts. The one who developed the \$FEED smart contracts infrastructure.

## Partnership & Marketing

- Natalia, 32 years old. From Argentina. Great experience in Partnerships & Marketing in international companies for 10 years.

## Creativity & content

- Diego, 48 years old. From Argentina. Has extensive experience in advertising and television. Director of communication teams. Has been internationally awarded on several occasions. Has been collaborating in different foundations like El Pobre de Asis and Rugby sin Fronteras for 6 years.

## Web design

- Rene, 31 years old. From Venezuela. He's a publicist and designer with 10 years of experience in digital marketing. He's art director in a publicity agency and he performs different independent works in publicitary design, ads investment, social media strategy, website consultancies and designing.

## Social Media

- Iara, 20 years old. From Argentina. Community manager in many businesses. Digital Business Management student.

## Community

- Paul, 31 years old, father of two. From Argentina. Professional poker and chess player. Programmer. Cryptocurrency investor since 2016. Has been performing charitable actions for 7 years.

## Disclaimer

Please read the entirety of this “disclaimer” section carefully. Nothing here constitutes as legal, financial, business or tax advice and you should consult your own legal, financial, tax or other professional advisor(s) before engaging in any activity in connection herewith. Neither FEED Token, any of the project team members, nor any service provider shall be liable for any kind of direct or indirect damage or loss whatsoever which you may suffer in connection with accessing this whitepaper, the website at <https://feedtoken.org/> or any other websites or materials published by the company.

Nature of the Whitepaper: This document is issued by FEED Token.

It is a conceptual paper that is envisaged to form the basis for the establishment and creation of a crypto economic token to be known as FEED Token (\$FEED). The Whitepaper and the Website are intended for general informational purposes only and do not constitute a prospectus, an offer document, an offer of securities, a solicitation for investment, or any offer to sell any product, item or asset (whether digital or otherwise). The information herein may not be exhaustive and does not imply any element of a contractual relationship. There is no assurance as to the accuracy or completeness of such information and no representation, warranty or undertaking is or purported to be provided as to the accuracy or completeness of such information. Where the Whitepaper or the Website includes information that has been obtained from third party sources, the Company, the Distributor, their respective affiliates and/or the team have not independently verified the accuracy or completion of such information. Further, you acknowledge that circumstances may change and that the Whitepaper or the Website may become outdated as a result; and FEED Token is under no obligation to update or correct this document in connection therewith.

Project purpose: All contributions will be applied in order to help Charity organizations to fight against world hunger and to make \$FEED known globally. You agree that you are to minimize losses and maximize gains to provide the best APY. You agree that you are purchasing \$FEED to participate in the monthly donations.

FEED Token is not acting in the capacity as a financial advisor or fiduciary of any person.
